SUMMARY

I am a Computer Science Engineering student. I have experience in Full Stack Development. I have worked with the MERN Stack. I also know about Machine Learning and I have built backend systems. I can develop applications that're secure and work well. I use Python and JavaScript to build these applications. I also use React.js and Node.js. I store data in MongoDB. I use REST APIs to talk to other systems. I understand how to design systems. I know about Data Structures and DBMS. I know what OOPs is and I like Software Engineering. I think AI-driven solutions and modern web technologies like the MERN Stack are very interesting. I like Computer Science Engineering. I want to learn more, about it.

EXPERIENCE

MERN Stack Developer Intern, SkillFied Mentor

01/2026 – 04/2026

Remote

- Completed a 3-month internship focused on MERN Stack Development.
- Built full-stack web applications using MongoDB, Express.js, React.js, and Node.js.
- Developed REST APIs and integrated frontend-backend workflows.
- Improved debugging, API integration, and deployment skills through real-world development tasks.

Web Developer Intern, InternPe

06/2024 – 07/2024

Jaipur, India

- Developed responsive web pages using HTML, CSS, and JavaScript.
- Implemented client-side form validation and optimized frontend interactions.
- Worked with Git and GitHub for version control and collaborative development.
- Improved UI responsiveness and user experience across devices.

EDUCATION

B.Tech in Computer Science and Engineering,

Vivekananda Global University, Jaipur, Rajasthan

CGPA: 7.56 / 10

2022 – 2026

Jaipur, Rajasthan

Senior Secondary, Senior Secondary (RBSE)

Percentage: 85.5%

2021

Rajasthan, India

TECHNICAL SKILLS

Programming Languages

Java, Python, C++, JavaScript

Databases

MySQL, MongoDB, SQL

Tools & Platforms

Git, GitHub, Linux, VS Code, Postman

Web Technologies

HTML5, CSS3, React.js, Node.js, Express.js

Machine Learning

NumPy, Pandas, Matplotlib, Scikit-learn

Core CS

Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, OOPs

PROJECTS

Hybrid Blockchain Cloud Storage System, *Python | Blockchain | Cryptography*

- Designed a hybrid cloud storage architecture integrating blockchain verification with cloud systems.
- Implemented SHA-256 hashing for secure file integrity verification.
- Built backend workflows for secure upload, retrieval, and validation of stored files.
- Focused on security, scalability, and immutability in distributed systems.
- GitHub: github.com/Shsrma

MERN Stack Authentication System, *MongoDB | Express.js | React.js | Node.js*

- Developed a secure MERN stack authentication system with login and registration functionality.
- Implemented JWT-based authentication and protected routing mechanisms.
- Designed responsive frontend interfaces and backend REST APIs.
- Improved security and session management using encrypted authentication workflows.
- GitHub: github.com/Shsrma

Credit Card Fraud Detection System, *Python | Machine Learning | MySQL*

- Developed a machine learning-based fraud detection system for transaction monitoring.
- Performed data preprocessing, feature engineering, and anomaly detection.
- Designed modular backend architecture for future ML model integration.
- Improved fraud prediction efficiency using classification techniques.
- GitHub: github.com/Shsrma

Personal Portfolio Website, *React.js | JavaScript | Netlify*

- Designed and developed a responsive portfolio website showcasing projects and certifications.
- Implemented modern UI/UX principles with optimized responsive layouts.
- Deployed and maintained the application using Netlify deployment workflows.
- Integrated project showcases, social links, and professional branding components.
- Live Demo: ankursharma-20.netlify.app

Disease Prediction System, *Python | Machine Learning*

- Built a disease prediction model using symptom-based datasets.
- Achieved approximately 85% prediction accuracy through model tuning.
- Applied supervised learning algorithms and comparative evaluation techniques.
- Improved preprocessing and predictive analysis skills.
- GitHub: github.com/Shsrma

CERTIFICATIONS

- IBM Cyber Security Certification – IBM Skills Network (2026)
- Data Visualization – University of Illinois Coursera
- Business Fundamentals for Entrepreneurs – NPTEL
- Introduction to Data Analytics – IBM Coursera
- Data Visualization and Dashboards with Excel and Cognos – IBM Coursera
- Management Information System – NPTEL
- Excel Basics for Data Analysis – IBM Coursera
- Data Science Math Skills – Duke University Coursera

ACHIEVEMENTS

Hackathons

- Participated in Hackathon 2.0 and Hackathon 3.0.

Software Development

- Built and maintained real-world software projects on GitHub.
- Active learner in AI, Machine Learning, Cybersecurity, and Full Stack Development.
- Regularly practice problem solving and development workflows.
- Maintained active coding and deployment workflows using GitHub and Netlify.
